

The Black Diamond Pro Tech Series sealers are color-enhancing and provide a no-gloss to glossy finish on masonry pavers, clay pavers, natural stone and other concrete surfaces. All of the Pro Tech Series products are breathable and can be applied to damp surfaces. These products also contain an industrial grade UV additive to protect the sealer and surface from the damaging effects of the sun's harmful rays.

- UV tested to ensure outstanding performance in the harshest environments
- Easy to use; no mixing; no waste
- Restores vibrant color to sun-faded pavers
- 300-500 sq. ft. of coverage per gallon
- Eco-friendly
- Various finishing available

SG+ Color enhancing, semi-gloss to gloss sealer for masonry and concrete surfaces. Ideal alternative to solvent-based sealers.

Stone+ Color enhancing, low luster sealer for travertine, natural stone and clay surfaces.

One-Part ULTRA-WET-LOOK Water Based Urethane Modified Acrylic Sealer

Nano Technology, high solids, low VOC water based urethane modified acrylic for a wet look enhancement. Penetrates the pavers and provides a protective barrier with excellent joint stabilization. **Ultra-Wet-Look** is formulated to seal products made to ASTM C-936 specifications and an absorption rate of 5% or less. Pavers with higher absorption rate will require additional application(s) of sealer. One-day process, provides a protective barrier, may be applied to a damp substrate, user friendly and environmentally safe, *35% solids, will not harm vegetation.*

Two-Part, Water Based Pure Urethane Sealer

Super Wet is a high solid, ultra-low VOC, two-part water based pure urethane sealer that penetrates the pavers to provide a barrier, beautiful enhancement and superior joint stabilization (no need for polymeric sand) resulting in a "wet look". Super Wet is user friendly and environmentally safe. The high solids content of pure urethane wears evenly and lasts longer than solvent based sealers.

EffloRemover is a user friendly organic acid that removes efflorescence and rust from the surface of the pavers. The Seal n'Lock efflorescence remover is user friendly, environmentally safe and also removes grout smears from the bullnose coping. Efflo Remover is available in a 5-gallon pail. Covers approx. 100 – 150 sq. ft. per gallon.

Ure-Seal H₂O

2-Part Urethane Clear Coat

Is a 2-part water reducible, crystal clear, Urethane sealer. It is a high performance clear coating that can be used inside or out to protect and enhance any properly prepared floor for years of service. ICT **Ure-Seal H₂O** has excellent abrasion and chemical resistance with a high gloss or natural finish. The mild odor makes it ideal for interior applications. **Ure-Seal H₂O** will not yellow and will form a very hard protective coating for high traffic area, counter tops, restaurants, decorative concrete, brick pavers. **Ure-Seal H₂O** can be used over epoxy flooring, garage floors, anywhere that high durability and superior chemical resistance is required.
